What is eMaps?

eMaps is a knowledge hub for life science innovators that offers modular, tailored information according to users' specific needs in the three technology areas of Drugs and Biotech, Medical Devices and Diagnostics and Digital Health.

The platform provides a "one-stop shop" for advice and information on key areas of market access including:

- Clarifying and testing value proposition
- Regulatory and compliance
- Pricing and reimbursement
- Market structure, key stakeholders and pathways to market access
